

Summary: Recommendations from Extra-Curricular Task Force

The Extra-Curricular Task Force met twice to try and consider the various activities that are related to school yet occur outside of the normal hours of a school day. We produced the following categories:

After School Clubs (i.e.. Volunteering Club, Drama Club, FLL)
Athletic Activities (i.e.. Interscholastic and intermural)
Fundraising (i.e.. Empty Bowls, Hot Dogs for Alzheimer's)
Childcare – (i.e.. Before/Afterschool Care)
Events – (i.e.. Concerts, Performances, Social Events)
Professional Teaching Activities – (i.e.. Parent Teacher Groups, Parent/Teacher Conferences)

The task force discussed a variety of different issues that played a role in helping us to determine our recommendations. We spoke about best practices vs. mandates, different environments (outdoor and indoor), different organizations that might utilize the facility, as well as other plans that have been created and disseminated by other school districts. We discussed concerns that we related to the regularly shifting recommendations from NH DHHS and/or CDC.

Recommendations from Extra-Curricular Task Force:

- We should have extracurricular activities and return to pre-pandemic levels.
- Protocols will follow the same expectations that are set for schools by the Health and Safety Task Force.

Expectations for attendance at events:

- Follow the school day policies related to the number of attendees. The use of facilities is about the amount of space in relation to the number of people allowed to be a spectator.
- We should follow the guidelines as set by DHHS, NHIAA and/or the National Federation of Sports for outdoor and indoor events regarding maximum capacity versus a diminished capacity.
